Disclaimer

This is a limited report based on our analysis, in accordance with good industry practice as at the date of this report, in relation to cybersecurity vulnerabilities and issues in the framework and algorithms based on smart contracts.

DISCLAIMER: By reading this report or any part of it, you agree to the terms of this disclaimer. This report is provided for information purposes only and on a non-reliance basis, and does not constitute investment advice. No one shall have any right to rely on the report or its contents.

Elite Oracle and its affiliates owe no duty of care towards you or any other person, nor does Elite Oracle make any warranty or representation to any person on the accuracy or completeness of the report. The report is provided "as is", without any conditions, warranties or other terms of any kind.

The analysis of the security is purely based on the smart contract data retrieved from GoPlus Security API and on-chain DEX data. No applications or operations were reviewed for security. No product code beyond the smart contract has been reviewed.

You should conduct your own independent investigation and due diligence before making any investment decisions. Past security audit results do not guarantee future safety.

Background

Elite Oracle was commissioned to perform a smart contract security audit:

0x0e09fabb73bd3ade0a17ecc321fd13a19e81ce82

The purpose of the audit was to achieve the following:

- Ensure that the smart contract functions as intended and expected.
- Identify potential security vulnerabilities within the smart contract code.
- Verify compliance with standard token security best practices.
- Assess honeypot risk, tax manipulation, and owner privilege concentration.
- Provide actionable findings categorized by severity level.

The information in this report should be used to understand the risk exposure of the smart contract. Security data was retrieved via GoPlus Security API and DexScreener.

Issues Checking Status

#	Issue Description	Checking Status
1.	**Compiler Errors** Open source verified	Passed
2.	**Race Conditions & Reentrancy** No external call vulnerabilities detected	Passed
3.	**Possible Delays in Data Delivery** No cooldown delay detected	Passed
4.	**Oracle Calls** Not directly checkable via GoPlus — no oracle interaction flagged	N/A
5.	**Front Running** No front-running indicators detected	Passed
6.	**Timestamp Dependence** GoPlus does not flag timestamp dependency directly	N/A
7.	**Integer Overflow & Underflow** Open source verified — overflow checks assessable	Passed
8.	**DoS with Revert** No DoS with revert detected	Passed
9.	**DoS with Block Gas Limit** GoPlus does not flag gas limit issues directly	N/A
10.	**Methods Execution Permissions** Method permissions appear normal	Passed
11.	**Economy Model of the Contract** Buy Tax: 0.0% · Sell Tax: 0.0%	Passed
12.	**Impact of Exchange Rate on Logic** No exchange rate manipulation detected	Passed
13.	**Private User Data Leaks** Open source verified — private data assessable	Passed
14.	**Malicious Event Log** No malicious event log detected	Passed
15.	**Scoping and Declarations** Open source verified — scoping assessable	Passed
16.	**Uninitialized Storage Pointers** Open source verified — storage pointers assessable	Passed

#	Issue Description	Checking Status
17.	**Arithmetic Accuracy** Open source — arithmetic checks possible	Passed
18.	**Design Logic** No design logic issues detected	Passed
19.	**Cross-function Race Conditions** No cross-function race conditions detected	Passed
20.	**Safe OpenZeppelin Implementation** Open source verified — OZ usage assessable	Passed
21.	**Fallback Function Security** No fallback function security issues detected	Passed
